PUBLICATION INFORMATION

CERCETĂRI MARINE / RECHERCHES MARINES is an international journal which publishes papers on all aspects of marine and coastal environment, preferably but not only from the Black Sea basin area. Minimum two international referees review each manuscript. International Editorial Board members advise the editors on the selection of supplementary referees.

The types of papers that can be submitted for consideration by the International Editorial Board are:

a) ORIGINAL SCIENTIFIC PAPERS:

Should report only original results. They are limited to 20 printed pages (80,000 characters). The publication of larger articles is subjected to the Editor's agreement.

b) REVIEW ARTICLES:

They should be invited by the Editor. They should be concise / up to 25 printed pages (100,000 characters), critical and creative. They should seek to stimulate topical debate and new research initiatives. Prospective authors are asked to send an extended abstract (two pages maximum) of their paper to the Editor by e-mail. The abstract should outline why the review is topical, its main points and objectives, and how it will stimulate debate and research. When the proposal has been accepted by the Reviews Editor, he will invite the author to submit a manuscript within an agreed time limit and following the general guidelines for submission of standard papers.

c) SHORT COMMUNICATIONS:

Short communications, which do not occupy more than four printed pages (16,000 characters) are short papers that present original and significant material for rapid dissemination and addressing new ideas, controversial opinions, "negative" results and much more.

d) CONFERENCE PAPERS:

Conference papers should report only original results which were presented on the conferences and symposia. They should be submitted as like as original research papers.

MISCELLANEOUS:

e) Anniversaries, evocations, personalities, *varia*, *in memoriam*, editorial signal, reviews. They are limited to 10 printed pages (40,000 characters). The publication of larger articles is subjected to the Editor's agreement.

Acceptance of papers: Papers will normally be critically reviewed by two experts in relevant disciplines and evaluated for publication by the Editor; however, the Editor may return to authors without review any manuscripts deemed to be inadequate quality or inappropriate for the journal.

CONTENTS

Marine Protected Areas Management: Interaction with Commercial Fisheries in Natura 2000 Sites along the Romanian Black Sea Coast - <i>Simion Nicolaev, Valodia Maximov, Victor Niță, Tania Zaharia, Magda-Ioana Nenciu</i>	5
Dynamics of Fish and Marine Mammal Populations at the Romanian Black Sea Coast in the Past 10 Years and their Evolution Trends - <i>Valodia Maximov, Simion Nicolaev, Eugen Anton, Gheorghe Radu, George Țiganov, Cristian Danilov, Magda Nenciu, Mădălina Galațchi</i>	26
Specific Diversity of the Romanian Black Sea Fish Fauna - <i>Aurelia Țoțoiu, Tania Zaharia, Magda-Ioana Nenciu, Victor Niță, Alexandru Nicolaev, Cristian Danilov, Mădălina Galațchi, Mariana Golumbeanu, Gheorghe Radu, Valodia Maximov</i>	50
Current Situation of Small-Scale Fisheries in the Romanian Black Sea Area during 2012- 2017 - <i>George Țiganov, Simion Nicolaev, Valodia Maximov, Eugen Anton, Mădălina Galațchi, Alexandru Nicolaev, Cristian Danilov, Cătălin Păun</i>	59
Analysis of the Balance between the Fishing Fleet Capacity and the Fishing Opportunities in the Romanian Black Sea Sector in 2015 - <i>Alexandru Nicolaev, Eugen Anton, George Țiganov, Cristian Danilov, Valodia Maximov, Cătălin Păun</i>	67
Steps Forward in Maritime Spatial Planning in Romania - <i>Laura Alexandrov, Gheorghe Radu, Eugen Anton, Alina Daiana Spînu, Dragoș Niculescu, Victor Niță, Magda-Ioana Nenciu, Alexandru Nicolaev, Adrian Filimon, Elena Vlăsceanu, Mădălina Gabriela Roșca</i>	75
Capacity Building and Expert Training in the Frame of the Constanta Shellfish Aquaculture Demonstrative Center - <i>Victor Niță, John A. Theodorou, Simion Nicolaev, Valodia Maximov, Magda-Ioana Nenciu</i>	92
Black Sea Eutrophication Dynamics from Causes to Effects - <i>Luminița Lazăr, Laura Boicenco, Oana Marin, Oana Culcea, Elena Pantea, Elena Bișinicu, Florin Timofte, Maria-Emanuela Mihailov</i>	100
Bioaccumulation of Contaminants in the Main Links of the Pelagic Trophic Chain on the Romanian Black Sea Coast - <i>Valentina Coatu, Andra Oros, Nicoleta Damir, Florin Timofte, Luminița Lazăr</i>	118
Current status of the benthic communities in the Romanian Black Sea waters - <i>Oana Marin, Valeria Abaza, Adrian Filimon, Camelia Dumitrache</i>	135
Mining the Black Sea Microbiome for Producing Natural Bioactive Compounds - <i>Elena Stoica</i>	145
First Measurements of Radon at NIMRD “Grigore Antipa” - <i>Vasile Pătrașcu</i>	155
A Short and Long Term Evaluation of along Shore Geomorphological Changes in the Danube Delta - <i>Alina-Daiana Spînu, Emanuela-Maria Mihailov, Luminița Buga, Dănuț Diaconeasa</i>	161
Interconnection between Winds and Sea Level in the Western Black Sea based on 10 Years Data Analysis from the Climate Change Perspective - <i>Maria-Emanuela Mihailov, Luminița Buga, Alina-Daiana Spînu, Lucian Dumitrache, Laurențiu-Florin Constantinoiu, Maria-Ionela Tomescu-Chivu</i>	171
Geomorphological Changes of the Sand Barriers from Musura Bay during 2008 - 2017 - <i>Silică Petrișoia, Răzvan Doru-Mateescu, Luminița Buga, Maria-Emanuela Mihailov, Dănuț Ilie Diaconeasa</i>	179
In memoriam ELENA DUMITRESCU - <i>Tania Zaharia</i>	187
In memoriam FLORICA PORUMB - <i>Nicolae C. Papadopol</i>	202
